

Welcome to HDD-Housing: Secure Offsite Backup

Welcome to HDD-Housing e.U.

HDD-Housing is a specialized **Online Colocation Service for Hard Disk Drives (HDDs)** based in Austria, founded in 2022. We provide a secure, climate-controlled, and high-speed server environment for your physical backup hard drives.

Unlike traditional cloud storage where you pay for capacity (GB/TB), with us, you **own the hardware**. This makes our service one of the most cost-effective solutions for large-scale data sets in Europe.

Key Benefits:

- **Data Sovereignty:** You own the disk; we provide the power, cooling, and connectivity.
- **Location:** Servers are located in the **Graz area, Austria**, ensuring strict EU data protection.
- **Flexibility:** Use your own 3.5" or 2.5" SATA or SAS drives with no storage capacity limit.
- **Ransomware Protection:** Server-side snapshots provide an immutable layer of security for your backups.
