

Why Choose HDD Colocation Over Cloud Storage?

HDD Colocation vs. Traditional Cloud Storage

For users with 12TB, 20TB, or 100TB+ of data, traditional "Big Tech" cloud providers become prohibitively expensive.

The Colocation Advantage:

1. **Fixed Costs:** Your monthly fee remains €20 regardless of whether your drive is 2TB or 22TB.
2. **Fast Disaster Recovery:** If you experience a total data loss at home, we can physically mail your HDD back to you. This is significantly faster than downloading 20TB over a standard internet connection.
3. **No Egress Fees:** We do not charge you "per GB" to access or download your own data.
4. **Physical Ownership:** You retain the asset. If you stop the service, you get your hardware back.
