

Setup Proxmox

Proxmox Documentation

<https://www.proxmox.com/en/proxmox-virtual-environment/get-started>

<https://pve.proxmox.com/pve-docs/chapter-pve-installation.html>

Enable No-Subscription Repository in web-GUI

node on the left -> Updates -> Repositories.

Disable the enterprise repository and add the No-Subscription repository

Go to the upper menu Update, press Refresh, then Upgrade

Untested Community Script

This script is quite popular in the homelab-community, but I never tried it. Look at the source code, if in doubt. No warranties at all.

<https://community-scripts.github.io/ProxmoxVE/scripts?id=post-pve-install>

Create ZFS Pool

See page [Create ZFS Pool](#), then continue here.

Permissions

```
chown - R 101000:101000 /pool/dataset-minio  
chown - R 101001:101001 /pool/dataset-syncthing
```
